REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Note that the art rejections in the Final Office Action mailed on 06/18/2003 have been overcome by the present response and declaration under 37 CFR 1.132. The declaration demonstrates that Horner (US 6,365,533) fails to teach or suggest the foam-coated web having a blow ratio within the claimed range in accordance with the calculation by using a blow ratio as defined by the inverse of the foam density. The inclusion of the foam coated web as defined in the claims having an air permeability at least of 338 CFM/sq.ft renders the claims patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 4,690,859 teaches a fire barrier fabric comprising a fiber glass fabric on which is coated a encapsulating coating in the form of a semi-stable foam. The coated fabric has an air permeability lower than 300 CFM/sq.ft.

US 4,606,944 teaches a foam coated mat having an air permeability lower than 300 CFM/sq.ft.
